

## **FIXED FRAME DAY CHAIR**

We start with T6 aluminium tube and then we precision roll it to create the perfect set of curves, all 9 of them. Then we gently heat and carefully compress the curved tubing until it forms in to our own specially profiled Melrose oval.

The formed oval tubing is introduced to the hangers, rails, camber bar and skirt guards, before being meticulously fused together by our highly specialized tradesmen.

To "pimp your ride" we've searched the world for the best components, then we pimped those as well when we replaced all the bearings with our special Melrose hybrid ceramic rollers. The Melrose award winning upholstery team then clothes the frame with adjustable tension seating and impact guards.

LIMITED EDITION with Spinergy Wheels, Soft Roll Castors, Aluminium Skirt Guards, Impact Guards and Scissor Brakes.

## LIMITED EDITION

#### MELROSE ERGO SEATING SYSTEM

A horizontal seat provides good pressure distribution with a neutral pelvic position while an angled seat gives better trunk stability and better pushing.

The ergonomic seat combines both horizontal and angled seating to give all three benefits. The ergonomic seat is angled, except for the back section, which is horizontal. The backrest is vertical and includes a rear-angled section at the top to give lumbar support for the spine.
