SCORPION

FIXED FRAME DAY WHEELCHAIR

Be careful around other wheelchairs, our Scorpion stings the competition.

The Melrose Scorpion is the lightest titanium wheelchair we have ever built. A 16" frame with the upholstery, forks and castors weighs only 3.9kg.

Incorporating an under frame to keep it strong and flex free, the new frame directs all your energy into motion with an effortless silky smooth ride and crisp dance moves.

Lightweight fork pivots with alloy casters and lighter close weave ballistic upholstery complete the package.
