

RUGBY LEAGUE SPORTS WHEELCHAIR

WARRIOR

MelroseHeat 
HEAT TREATED ALUMINIUM FRAME

As a recent sport, the technology for Rugby League wheelchairs has already been developed with the light weight of the Melrose Basketball wheelchair and the strength of the Melrose Rugby wheelchair. We have combined these two ideas with a light weight 1" frame built with 1.5" bottom rails. The bottom rails are further reinforced with 1.5" tubes to the capped 1.5" wing for additional strength. Although Wheelchair Rugby League is a non

contact sport, experience has taught us that a strong wheelchair will perform better over extended time.

All our Rugby wheelchairs are built by highly experienced fabricators who understand the sport of rugby. We use the highest quality materials and components to build our wheelchairs.
